INFORMATION DISCLOSURE STATEMENT

Sir:

In accordance with 37 C.F.R. 1.98, I am submitting a completed "INFORMATION DISCLOSURE STATEMENT BY APPLICANTS" (*Form PTO/SB/08A*) with patents and/or publications as delineated therein attached.

EP 0 949 455 A1 discloses that the heating unit has a bypass valve (7) with a solenoid operating unit (8), which is coupled with a fan (9), is arranged in a bypass to the fuel supply line (5), upstream from burner stages (1,2). Thus, when increased heating power is required, an increased fuel supply to the burner stages results by the opening of the bypass valve by the solenoid. The bypass valve is only operable, if the fan is in operation. The throttle element is arranged in the fuel supply line, before its branching to the burner stages, outside from the bypass.

DE 42 25 789 A1 discloses that the pressure of gas is measured (5, 14) before and after being reduced by a regulator (7) to which a set-point value is communicated (8) by a stored-program controller (9). The regulated pressure (Pv) is applied to the heater (32) via a number of parallel magnetic valves (21-24) with reference nozzles (25-28). The valves (21-24), normally closed, can be opened individually by the controller (9). The nozzles (25-28) serve as adjustable constrictions selected either singly or in a group.

If no translation of pertinent portions of any foreign language patents or publications mentioned within the "INFORMATION DISCLOSURE STATEMENT BY APPLICANTS"

107540241

JC17 Rec'd PCT/PTO 22 JUN 2005

is included with the aforementioned copies of those applications, patents and/or publications, it is because no existing translation is readily available to the Applicants. As per the Notice in 1273 OG 55 (August 5, 2003) no copies of any above-mentioned US patents and US patent application publications are submitted for this application which was filed after June 30, 2003.

Respectfully submitted

John T. Winburn
